How to use this book

Welcome to English Grade 7!

Hello and welcome to English Grade 7! We hope you have a fantastic year and have as much fun teaching the materials as we did writing it!

The idea of the book

This book is designed to be fun! Students learn better when they are having fun, and teachers teach better too! The idea isn't to have students copying things off the board and being bored (and getting naughty!), it is about students using the language to play games, solve puzzles, express themselves, communicate and have fun!

What do students learn?

This book is designed to be the main text book for Grade 7 Cambodian students. By the end of the book, students will be well on their way to being A2 level English learners! Students learn the four skills, grammar and 21st century skills. There is more speaking and listening than reading and writing.

Skills – Listening, Speaking, Reading and Writing

This book is all about students always doing and always being interested! The readings and listenings are a great mix of engaging, interesting and funny storylines. The speaking and writing encourages students to use their fantastic imaginations! You will probably notice there is very little grammar in this book the way you learnt it as a kid (Hurray!). That's because kids at this age learn grammar much better by actually using it! By listening to it, reading it, writing it and speaking it.

There are lots of great listenings with actors from all around the world so students get to hear lots of different accents and be able to talk from people from all around the ASEAN community and the world! If you don't have **the recordings** yet, just go to the **Ministry of Education Youth and Sport** and **download them for free**!

Grammar

This book does teach grammar, but don't worry! It's not boring! Teachers don't talk forever and students don't copy off the board! As I'm sure you remember from your school days, young learners find grammar and copying boring, and if they are bored they won't learn. There is almost never a point in explaining grammar to children in the same way you would an adult. Don't worry! They will still learn grammar! But they will be able to read it, listen to it, write it and say it!

More than just English – 21st century skills

We don't know what skills and knowledge people are going to need in the jobs of the future, so teachers today need to be helping kids to be independent learners, great communicators, creative, flexible, and ready for anything life throws at them.

As teachers we have to help students to learn to think, cooperate, communicate and work well, fairly and supportively with their fellow students. This book is designed to encourage a classroom environment to support this where students feel well supported in making mistakes and playing with the language. Students learn group work, how to be supportive of other students, and how to think for themselves and be creative.

They also start to look at the world beyond Cambodia's borders and explore how different countries and culture live. This way, students learn and appreciate different cultures (and hear different accents!).

The idea of teachers teaching knowledge is dying. Teachers teach students to think and learn!

So, how do students learn all this?

This book has been written with the latest research about how kids learn in mind. This book is all about students always doing and always being interested and enjoying themselves, but that doesn't mean they are screaming round the classroom all lesson!

Stirrers and settlers

Any good young learner's teacher knows about this golden rule of teaching! The idea is that a lesson will switch from stirrer to settler to stirrer to settler throughout the lesson. "Stirrers" get the kids excited and "settlers" calm them down. This way, kids can concentrate and learn and behave!

/moeyscambodia /krou.moeys.gov.kh http://oer.moeys.gov.kh #OERCambodia

That's why our lessons are written as a good balance of both. If you look at a lesson plan in the book, you'll see that the activities change from exciting activities that wake the students up, to quiet activities that calm the students down and then back to an exciting activity again.

Learning in context

Students learn new grammar and words as well as the 4 skills through games, stories, songs, tongue twisters and being interested! The book has been written with 13 year olds in mind using themes and contexts that they will find funny, sad, interesting, and fun! Our aim is that students will be interested in the *context* of every lesson.

You will notice that new words and grammar are hardly ever explained. That's because young learners are really good at learning new grammar and words just by seeing them in context. Long explanations and talking about nouns and adjectives only make students bored, they don't make them learn, so instead we just skip them and try to keep students having fun and interested, and engaged with the language!

Through creativity

Often there is no "correct" answer to some questions and many different grammatical forms are possible. By not giving a "correct answer" and by focusing on effective modeling, students are encouraged to explore the language and play with it as they go.

Why the book is great for teachers too!

Easy to use lesson plans

We have written 'grab and go' lesson plans so all you need to do is to read them before class and think about the reason for each stage – no other preparation needed! We have even written the answers in and provided tapescripts just in case! And, everything is in English so you can remember to be all in English as well! But just because everything is done for you, don't think that you can't try out your own games and activities. We hope this book helps you get the confidence to play around with your own ideas as well! As long as they're fun and in English, your students will love them!

Reflection

We have written some things to help you reflect on your teaching at the end of each lesson and help you get better and better every day – just like your students!

Glossary

Teaching English Dictionary: Words, ideas and fabulous teaching tips!

Ask and answer questions as a class: This is when students find out if they were right or wrong. Students need to know they have understood correctly. There's lots of different ways of doing this. If you have a busy lesson, it's often enough to just yell out the question, and have students yell back the answer. Another way is to ask students to answer one by one. Be careful! Some teachers only ask "good students". This makes other students wonder why you didn't ask them. They might think things like "Does the teacher think I'm stupid?" Another thing to watch out for is some teachers waste a lot of time copying the answers on the board and then allowing students 5-10 minutes to copy the correct answers in their notebooks. Students aren't really learning while they are doing this, and this is valuable time that could be used to actually practice the language, which students will learn a lot more from!
Boarding useful target language: This is great for reminding students of the structure/ pronunciation they should be using.
e.g. Just say students are talking about what their friends like, but are forgetting the 's' sound. Why not write *"She like**s** …"* in a speech bubble on the board? That way you are not interrupting students, but you're reminding them of the grammar without using grammatical terms.
Brainstorming: This is a great habit to try and get your students into and will help them in university and beyond! Students brainstorm before they write (and sometimes speak depending on the activity). There's lots of ways to try and do this. You can have students draw, talk, draw pictures or even close their eyes and listen to music!
e.g. You want students to write about their best friend, but worried that students will say that they don't have any ideas. You could have students draw a picture of their best friend and write as many adjectives as they can in a few minutes. This helps students to get ideas without worrying about sentence structure or being neat.
Copying from the board: This has been very popular in Cambodian classrooms for a long time. The problem with English class is though, that it only goes for 50 minutes! A rule of no more than 3- 5 minutes copying a lesson is probably a good idea!
Class discussion: This is when you talk about a subject as a class. These can be useful, but make sure that **you** are not talking too much and students know to listen and be respectful about other people's opinions!
Concept checking questions: These are questions you can use instead of "Do you understand?" Students don't want to look dumb in front of their friends so they always say "yes"! Concept checking questions are usually about vocabulary or grammar. They can be

very easy!
e.g. You have just taught the words “pen” and “pencil”. Point to a pen and ask “Is this a pencil?”
Cool kids say: This is a way of introducing natural spoken English. In the book, you’ll often see this. Have you seen something similar to *cool kids say* in other books?
Connected speech: Native English speakers don’t say one word at a time. They say things quickly and all together and they don’t say some words clearly.
e.g. Native speakers won’t say: *Where. Are. You. From?* /weər/ɑ:r/ju:/frɒm/. They’ll probably say *Wheraya from?* /weərə/jə/frɒm/.
Make sure students listen to and practice the way words are said **naturally**.
Controlled practice: This is when students answer grammar questions when there is really only one right answer. These exercises are supposed to be quick and are just so that students check that they understand a grammar rule.
Drill: Drilling is when students listen and repeat a word or phrase after the teacher, the recording, or another student so that they can try and say it exactly right. There are lots of ways to drill. You can have students do an action when they say a word, get quieter and louder and use hand actions to show the stress. Be careful, though! If you drill too much, students will be bored and feel like they can’t do it right.
Drilling used to be very popular, but now people don’t like it as much because it gives the idea that only the teacher can say a word correctly. Listen to your students. Is someone saying the word really well? Get your students to repeat after that student!
Emergency settlers: These are very useful for when everyone has gone crazy! There are lots of different types of these.
e.g. Shout “Freeze!” Everyone has to freeze (stop) exactly as they are and the last one is out.
Emergency stirrers: Have you ever looked at your class and thought that they looked really really bored? Maybe some people are falling asleep and other kids are looking out the window. You should try an emergency stirrer!
e.g. Get everyone one up and do *Heads, Shoulders, Knees and Toes* or play a quick game! Your students will get *a lot* more work done after!
Encourage: Tell students what they are doing well a lot! It’s much easier to encourage good behavior than to punish “bad” behavior. Kids need a lot of this, even (or sometimes particularly) ‘naughty kids’! The best English classrooms are fun and supportive!
End sounds (terminal consonant sounds): In Khmer, we don’t really make the last sound of a word, but in English it’s really important! Remembering to make the last sound in English can be really hard for students! Words ending in ‘s’ or ‘ed’ are extra hard because the noises change! Helping students make the end sound means that people will be able to understand them a lot better, especially native speakers!

English only classroom: An English only (or almost English only!) classroom is the best way for anyone to learn English! Let’s look at some of the reasons why.

- If students don’t speak English, they won’t learn English. If everything is in English, students spend more time practicing English!
- The more practice students have, the more confident and comfortable with English they’ll be!
- Students will learn meaningful English. e.g. “May I go to the bathroom?” “What do you think?”
- If students are switching from Khmer to English, they are probably using Khmer grammar and pronunciation which is **very** different to English grammar and pronunciation. Students can form bad habits this way.
- If students are speaking in Khmer, they aren’t thinking in English.
- The more students speak in English, the more students are thinking in English. When students are able to think in English, they learn **so much** faster!

But if you want to make your kids speak only in English, you have to do it, too! In an A1 classroom you’re going to have to use a lot of body language, but you can do it!
Give yourself a daily challenge. See how much of your lesson (from you and your students) can be in English!
Error correction: Telling kids when they’re wrong is tricky and much less useful than when you tell an adult they are wrong. You have to make sure kids still feel great about taking risks and making mistakes. It’s better to look for correct usage and then tell the class how good it is (and the student who did it obviously!) There is no point being fussy and jumping on every little mistake!
e.g. You have been talking about what students’ friends like and you have noticed that some students are forgetting the ‘s’. You hear that one student is remembering the ‘s’.

Teacher: OK let’s come back together. Tevy, what does your friend like?
Tevy: She like icecream.
Teacher: Great. Bopha, what does your friend like?
Bopha: He like**s** cats.
Teacher: Great! I like that! Can everyone hear the ‘**s**’ in like**s**? Say it again, Bopha.
Bopha: He like**s** cats.
Teacher: Let’s all try saying it like Bopha.
Class: He like**s** cats.

You haven’t told Tevy she’s wrong. She’s been brave, spoken in front of the class and used the language in a way everyone can understand. It’s not the end of the world that her pronunciation is wrong.

Follow up questions: These are great! If you have 2 students in a question/answer session, making students ask follow up questions means that they have to listen to their partner speak and that they are using English in a natural way.
Free practice: We usually use this word when we’re talking about grammar. This is when students get to try out and play around with the language in a way that is meaningful to them. We don’t worry too much about students using “perfect” grammar. This is really when

/moeyscambodia /krou.moeys.gov.kh http://oer.moeys.gov.kh #OERCambodia

students gain confidence and fluency. This is the main point of lesson. If students don't practice it, there is **no** point in teaching it! There is **zero** reason to teach new words and grammar if students don't get to **use them** in meaningful ways. Often this is speaking and writing where students use the grammar in a natural way through role plays, creative writing and personalisation.

e.g. You have been studying the present simple. Students have seen the grammar in context in a listening, and looked at the rules. They then talk about their daily routine.

Getting kids to move around: Some classes in Cambodia are very crowded and it would take too long to get everyone in and out of their seats. Because of this, we mostly we have kids sitting down in our lesson plans. If you have enough room, don't be shy to get kids up and jumping up and down!

Give a time limit: Students need to know how long they have to do things. It helps them understand what you want (making notes, or detailed writing). It also means students are more likely to stay on task (do what you tell them to)! If students don't have time limits, they might feel like you're being unfair when you tell them time's up, or if they have too much time, they will start doing other things.

Grammar: Grammar means the set of rules about how a language works. All language learners need to become familiar with grammatical rules to be understood. But adult learners and young learners are different. Adults often find it useful to break things down into nouns, adjectives, clauses and phrases, but spending lessons copying out the rules of the present perfect doesn't benefit younger students! They find it too hard to connect the grammar with the language and get bored and naughty. Younger learners learn grammar in context through reading, listening writing and speaking – in other words **practicing** the structure.

Grammar is another reason to enforce an English only classroom rule. Khmer grammar and English grammar are very very **very** different! Students find it hard to switch between to 2, and can form bad habits this way which can be very hard to break later.

Homework: Do you remember homework as a kid? Did you love it? Hate it? What did you miss out on doing because you were doing homework? How much homework do you think kids have from all their other subjects? What do you think would happen if you didn't give homework for a week?

A lot of people give homework because – well just because! If all a student's teachers give homework, they can end up with a lot! People think that if students have lots of homework they'll do better, but there is very little real evidence for this. Let's think about a grammar worksheet. Students who already understand the grammar are wasting their time, and students who don't understand will feel sad that they can't do it at school or at home!

In fact, having lots of homework can be very bad for kids! Let's look at some of the reasons.

Students have less time to spend with family and friends.

- Students will have no time to do what they want.
- It can make students feel like they don't like learning.
- It can make students tired in class the next day so they can't learn very well.
- It can cause fights at home – especially with weak students.

Can you think of any others?

If homework is given, it should help students to think and engage. It should be given only when it's important, not just because – well just because!

Instruction Checking Questions – These are **great!** They help you to see if students understand what you want them to do and they can help you speak Khmer less in class. It's easy! You tell students to do something and then ask questions about what you want students to do, and how you want them to do it. So, your instruction checking questions might look a bit like this:

Teacher: Close your books, and talk with your partner about the questions on the board. Books open or closed?
Class: Closed!
Teacher: Talking or writing?
Class: Talking!
Teacher: Where are the questions?
Class: On the board!

Can you see the instruction checking questions? They are *Books open or closed? Talking or writing?* and *Where are the questions?*

You can also use instruction checking questions to make sure students remember to behave well. So, your behavior instruction checking questions might look a bit like this:

Teacher: I want you to talk to your partner about their weekend. I want you to listen. How can we be good listeners? Do we play with our things or look at our partner?
Class: Look at your partner!
Teacher: And what can you ask after?
Class: Extra questions!

Look at the lesson plans. We have written in where you can ask your own instruction checking questions.

Lead in: This should be quick! This is so that students can start thinking about the content or the themes of the lesson. For instance, if the lesson is about a day at the zoo, you might like to ask students to talk to their friends about animals they expect to see at a zoo.

Listening for the big idea: This is also called the *gist listening* or *listening for the main idea*. This is the first listening. Students only need to understand the basic idea of the listening. They don't need to hear every word. Just mainly understand what the purpose of the listening is.

Live listening: A live listening is where you don't use the recording and you use people in the room to do the voices! You can read the listening yourself, or you can get students to read. You can have different students be different characters. This can be great homework for kids!

Model: This is when you show students what you want them to do. You might model a grammar question, a word, a piece of writing – almost anything! For example, if you are doing writing, it is useful for students to see a similar piece to what you want them to write. This **doesn't** mean that students copy, it means that they have an idea of what you want from them.

Note taking: In this book, note taking is a type of brainstorming. See *brainstorming*.

Peer correction: This is when students correct each other's work. Let's face it, you don't

/moeyscambodia
/krou.moeys.gov.kh
http://oer.moeys.gov.kh
#OERCambodia

have time to correct everybody's work! Especially in the middle of class when there are 50 kids in the classroom! But why do we correct anyway? It's so kids think about correct grammar/spelling/structure (whatever!). If students correct each other's work, they are thinking about these things.

Personalisation – *The more meaningful, the more memorable.* If students can relate a lesson to their own experience of the word, and it means something to them personally, it is much easier for them to understand it. You will often see this as a post task, but could be a lead in as well.

Post task: This is done after the free practice. The idea of a post task is usually that students personalise the lesson and make it meaningful to them in some way. For example, if the reading is about a girl in Russia talking about her grandmother, a post task might be students talking about their own grandmothers.

Pre-teach: This is when you teach a word or idea before a listening or a reading so that students can ***understand*** a reading or listening better. This is my best teaching tip about pre-teaching words – Students don't have to understand all the words! Kids are really good at guessing what words mean as well (much better than us old teachers!). Young learners can understand a new word by looking at the words around it and guessing.

Put students in groups: Good grouping can make or break a lesson! I like to vary my groups so students are working with someone new every lesson. This means that students end up feeling safe in front of everyone. I also like grouping students together randomly! If you group students according to their skill level, it's the same as telling some students you think they are bad at English.

Reflection: Reflection means looking back on your lesson so you can think about what went well, and what you can do better next time! Reflecting doesn't mean you're a bad teacher. In fact, teachers who think they are already perfect and don't think they need to improve are probably bad and boring teachers! Reflections help you become a better, more confident, happier teacher. They also help your critical thinking skills and creativity, so it's not just students who get to have fun learning!

Roleplay: Role plays are when students pretend to be someone they are not and then talk to their partner or group. For example, one student pretends to be a parent, and the other student pretends to be the kid. Role plays can be really funny, and they're great because students feel safe to say whatever they like without worrying if their friends think they are cool!

Student-centred classroom: This is what we are aiming for! New ideas about learning language say that students learn by doing. In a student centred classroom, the teacher talks as little as possible and lets the students spend most of the lesson practicing English. This is much better than the teacher talking about grammar for hours on end, and much more interesting for the students and the teacher!

Students listen for the answers – This is also known as "listening for detail". Students will have already listened once and know basic information about the listening like where it is, who is talking and why. When students listen for the answers, we want them to practice picking out specific information. Usually, students won't be able to do this on the first listening.

Stirrers and settlers: "Stirrers" get the kids excited and "settlers" calm them down. Any good young learner's teacher knows about this golden rule of teaching! The idea is that a lesson will switch from stirrer to settler to stirrer to settler throughout the lesson. This way, kids can concentrate and learn! You should try to never have an activity that goes for more than 15 minutes – and that goes for stirrers or settlers. If a settler goes on for too long, students get bored, off task and find other ways to entertain themselves (like being naughty or annoying fellow students). If stirrers go on for too long, kids get over stimulated, silly and off task (like being naughty or annoying fellow students!).

That's why our lessons are written as a good balance of both! If you look at a lesson plan in the book, you'll see that the activities change from exciting activities that wake the students up, to quiet activities that calm the students down and then back to an exciting activity again. Have a look at one of the lesson plans. Can you spot the stirrers and settlers?

Students guess: This is when students look at clues and try and guess what a listening, reading or lesson is about. It's quick, but this is a really important stage of the lesson! It helps students recall useful words, and things that they already know about the subject as well as let them think about what they guess they are going to hear.

e.g. Students will listen to a student talking about a scary experience. The teacher draws 3 things from the story on the board and students need to try and guess what the story is.

TTT – This stands for **t**eacher **t**alking **t**ime. It means the amount of time that you talk at the front of the class. An example of good teacher talking time is asking quick effective questions (but there are lots of different types!). Bad teacher talking time is repeating in Khmer or going into too much detail with explanations. Remember the golden rule! 80% of the lesson – students do, 20% of the lesson - teacher does!

Warmer. This can be a **quick** game or fun activity to get students to start thinking in English. It may or may not link to the last lesson or today's work. The main things that you need for a successful warmer is that they be fun and in English! Warmers are great, because they get kids ready and focused for the lesson and give kids a great and fun reason to turn up on time (but also give a chance for late students to arrive).

Word stress: In English and Khmer, we say some syllables louder than others. Think about these words in Khmer. They all have 2 syllables. Which sound is louder?

chgoot - ឆ្កួត s'dup - ស្តាប់ chveng - ឆ្វែង sadam - ស្តាំ cyclo - ស៊ីក្លូ

Now think about these words in English. They all have 2 syllables. Where is the stress?

silly partner English bathroom cyclo

Did you guess? In the Khmer words, the stress is on the second syllable. In the English words, the stress is on the first syllable. The stress isn't always on the first syllable in English, but students stressing the wrong part of the word is a common problem for Khmer learners of English.

Chapter 1, Unit 1, Lesson A

At a new school: Meeting new friends: How are you today?

This lesson uses recordings which can be downloaded from the Ministry of Education, Youth and Sport website. (50 mins)

(5 mins): Warmer. Play *'Buzz'* - Review numbers 1-20

1. Write the number '2 'on the board.
2. Tell students to count up to 10, but for every multiple of 2, they say *'buzz'* (*e.g. 1, buzz, 3, buzz, 5, buzz…*).
3. Write another number on the board (*e.g. 3*)
4. Tell students to count up to 20, but for every multiple of 3, they say *'buzz'* (*e.g. 1, 2, buzz, 4, 5, buzz…*)
5. Put students into groups of 4/5.
6. Write another number on the board.
7. In groups, students take turns counting up one number at a time, but for any multiple of that number, they say *'buzz'* (*e.g. 1, buzz, three, buzz…..*).

NOTE:

You may like to revise pronunciation very quickly either before or after the game. Cambodian students tend to leave off the final consonant sound and numbers are a good place to start working on this problem with them. /wʌn/ /tuː/ /θriː/ /foːˑ/ /faɪv/ /sɪks/ /ˈsev.ən/ /eɪt/ /naɪn/ /ten/ /ɪˈlev.ən/ /twelv/ /θɜːˈtiːn/ /foːˈtiːn/ /fɪfˈtiːn/ /sɪkˈstiːn/ /sevnˈtiːn/ /eɪˈtiːn/ /naɪnˈtiːn/ /twentɪ/

1 **(2 mins): Activity 1. Lead in**

1. Ask some students: *'What is your name?' 'How old are you?' 'How are you today?'* If students respond in Khmer, use the English words and ask them again.

   Student: *Khynom chmore Davy.*
   Teacher: *MY name is Nith. What is your name?*
   Student: *My name is Davy.*
   Teacher: *Yes! Your name is Davy!*
   Teacher: *What's your name?*
   (to a different student)
2. Repeat with the rest of the sentences, but don't worry if students can't answer in full English. This is just to get them thinking about what the English answers are.

2. Listen to students answers. Are students confident? Are all students, or only students who already knew todays lesson? Who might need extra support/encouragement?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Students learn far more from talking with their friends than they do listening to the teacher! Comparing answers before coming back together as a class means that students support one another in learning the correct answer (and the reason it's correct!). Did you give enough time for students to self-correct their work?
2. When you do ask and answer questions as a class, this should be a quick confirmation of what students already know. Did you spend too much time talking about the correct answers?
3. Are there groups of kids who are not working well together? What can you do to make sure everybody can work well (e.g. break up groups who are always off task)?
4. Do you encourage an environment where students feel confident to talk with their groups?
5. Your own question(s). _____?

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Students who believe that they can do things are much more likely to be able to! How did you encourage your students today?
2. Do you only tell the strong students that they did well, or do you tell weak students who are trying hard that they are doing well?
3. How could you do this lesson better next time?
4. Your own question(s). _____?

Think about the answers to these questions. You don't have to tell anyone the answers!

1. It is best to have as little Khmer in the classroom as possible. If you do use Khmer, it is better not to use it to translate things that students can probably guess by themselves. This is particularly true of kids. When did you use Khmer today? Did you really need to use Khmer?

3. How could you do this lesson better next time?
4. Your own question(s). _____?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Students remember better if lessons are personal to them. One way to help this is to encourage creativity. Did you encourage your students to be creative?
2. How could you do this lesson better next time?
3. Your own question(s). _____?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. The students should know the new words now. The book uses lots of pictures so that you don't need to translate the word in Khmer. (Remember, you're trying to have a class that is as close to 100% in English as possible!) Did you translate new words? Do you think that was a help? Why?
2. How much of the lesson was in English? How much was in Khmer?
3. How could you have students use English more and Khmer less?
4. Could you use English more and Khmer less?
5. How could you do this lesson better next time?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Do you have 'classroom rules'? How effective are they? Do you stick to the rules closely? Children work best to classroom rules that are fair and unchanging. Classroom rules help you manage the class better. They help students understand what is expected of them.
2. What do you do when students break 'the rules'? Do you embarrass them in class or talk to them quietly after class? Can you think of other ways to avoid embarrassing your students when they break the rules?
3. Modelling the rules yourself helps students understand what is expected of them. Do you follow your classroom rules?
4. Students are likely to respect the rules if they helped to create them. Don't just tell students what to do! Ask them for their ideas, and make the rules together. Or ask students to set their own classroom rules. You may be surprised at the results!
5. Your own questions: _____?

She is *prettier than* my friend. (pretty)
He is *younger than* my brother. (young)
My dad is *older than* my mum. (old)

Yes or no?

Did you talk about **two** people or **two** things? *yes*
Did you add **–er** to the words? *yes*
Did you **change y to –ier** in pretty? *yes*
Did you add **than**? *yes*

(2 mins): Learner assessment and lesson wrap up

Assessing the success of the lesson. Not testing all the students!

1. Review some of the sentences as a class.
2. Are students using articles? (The pen is bigger than the marker etc)? Are students using than? Are students confident using comparative adjectives?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Skimming is reading quickly to get a general understanding of texts. This skill is very useful for students. Students don't have to understand all the words in a text to understand it. Can your students skim texts well, or do they stop reading when they see new/difficult words?
2. Giving a short time limit when reading helps students with this. How can you help students skim texts better? Think of 2 ways. Then try them out in your next class.
3. Your own questions: _____?

Chapter 4, Unit 10, Lesson C

In my family: My family: I'm taller than my sister

(7 mins): Warmer.

1. Recall adjectives.
2. Allow students to call them out.
3. Write them on the board as they call them out. Write about 10 adjectives.
4. Let students call out 10 names of their classmates (teacher's name, optional). Write them on the board.
5. Put students into groups of 4/5.
6. Give a time limit of 2 minutes.
7. In groups, students write as many comparative sentences as they can within the time limit.
8. Feedback: Allow students to call out their sentences. Give points for each correct sentence. Board some incorrect sentences. Ask questions to help students correct the sentences.

Note:

Students making sentences about themselves should be fun. However, some students might find this offensive. In which case, when nominating students' names to be written on the board, the teacher should be sensitive and discretion is required. Including the teacher's name on the list might lighten students up a bit.

1 **(7 mins): Activity 1. Broken words**

1. Tell students to look at the broken words. Ask: *What goes with bro? ter?* Students: No! *Ask: ler?* Students: No! Ask: *ther?* Students: yes!
2. Tell students to complete the rest of the word halves in their notebooks.
3. Ask instruction checking questions and give a time limit of 5 minutes.
4. Students compare their answers with their partner/group.
5. Ask and answer questions as a class.

2 **(10 mins): Activity 2. Crack the code**

1. Write 5 and 10 on the board.
2. Tell students to look at the table. Ask What letter is 5? *H*
3. Write *H* on the board.
4. Tell students to look at the table again. Ask What letter is 10?e
5. Write e on the board.
6. Put students into groups.
7. Tell them to use the given code to make sentences.
8. Give a time limit of 8 minutes.
9. The first team to write the sentences wins.

3. Give a time limit of 10 minutes.

4 (10 mins): Activity 4. Communicative task

1. Put students into 2 big teams.

3. In teams students think of a comparative sentence (**e.g.** A hippo is bigger than an elephant)
4. Teams decide if their sentences are accurate.

(5 mins): Learner assessment and lesson wrap up

Assessing the success of the lesson. Not testing all the students!

1. Ask students to look at the "can do" statements.
2. Compare with a partner.
3. Ask students how they feel about the can do statements. Tell students not to worry about the ones they don't tick.

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Competition can be motivating and fun, but some students might become over competitive and others might be disappointed when they lose. How is competition in your class – is it friendly or harmful?
2. Smile often. This is one good way to promote friendly competition. Smiling shows that it is just a game. When students see you relaxed, they are more likely to enjoy the activities. Also, keep the winning and the losing as light-hearted as possible. Try these out in your next lesson, and you're likely to have fun, too!
3. Can you think of 2 more ways to promote healthy and friendly competition in class? Make sure you try them out in your next lessons.
4. Your own question(s). _____

3. The student then guesses the word.
4. If the student guesses the word correctly, it's now his/her turn to write on another student's back.
5. Tell students to open their books. They choose words learnt in previous units for this activity.

   TIP: Some students might not feel comfortable with the idea of touching each other's back, so separate boys and girls groups might work better for this activity.

1 (5 mins): Activity 1. Lead in

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Sometimes class should be fun, and it is more important that students are having fun than saying things "perfectly". A lot of people think that in English class, fun is the most important thing! Were your students having fun?
2. It is more important that kids feel confident than be perfect! Do you correct kids too much?
3. Do you think the kids in your class feel brave enough to make mistakes?
4. How could you do this lesson better next time?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Kids like exciting lessons. If you give them time to get bored, they will speak in Khmer and be naughty. Did you let students take too much time with activities? Were students talking to their friends in Khmer and doing other things?
2. Did you stick closely to the times stated in the plan? If not, why not?
3. How can you time the activities better next time? Think of 2 ways to try in your next lesson.
4. Your own question(s). _____?

Then in the afternoon, we always go for a walk – in the park, near the lake, at the shop, everywhere! Sometimes we take the dog for a walk too! Then he buys me ice cream! Yum! I love Saturday and Sunday with grandpa! Sometimes we go horse riding. Sometimes we ride our bikes up to the mountains. Yes, my grandpa is really strong! Before dinner, we watch TV together. We watch Cartoon Network. He loves Tom and Jerry. We like Tom and Jerry!

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Students need short, simple and clear instructions. If instructions are too long, they stop listening! Were your instructions short and clear?
2. One good way to make your instructions clear and simple is to write them. Find time in the next few days to write at least 5 instructions you often use in class – in English! This will save you time!
3. How could you do this lesson better next time?
4. Your own question(s). _____?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. ALL teachers make mistakes! Even good teachers make mistakes. Sometimes we give the wrong answers. What do you do when you're wrong? Do you pretend you're right, or do you admit your mistake and correct it?
2. Why do you think pretending you're right isn't helpful?
3. You can avoid making mistakes! Go through your lesson before class. Answer the questions in advance. Any more ideas? Think of ways to avoid making mistakes in class.

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Good instruction checking questions are important! If you ask students if they understand, students will always just say "yes!" A better idea is to ask questions like "Should you be Reading or speaking?" "Should you work alone or with your partner". Did you just ask yes/no instruction checking questions or did students need to think about the answers?
2. Your own question(s). _____?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. A teacher doesn't have to KNOW EVERYTHING. It's OK to say "I don't know!" What do you say when students ask you a question you don't know the answer to? Do you give them a wrong answer, or do you tell them you don't know and that you will find out the answer?
2. If you don't know the answer to a question, you can ask your fellow teachers, go on the Internet, or use the library. Try one of these the next time your students ask you a question you don't know the answer to.
3. How could you do this lesson better next time?
4. Your own question(s). _____?

Also, keep the winning and the losing as light-hearted as possible. Try these out in your next lesson, and you're likely to have fun, too!
3. Can you think of 2 more ways to promote healthy and friendly competition in class? Make sure you try them out in your next lessons.

2. Praise students who came to class on time today. Encourage the others.

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Getting students to tell you about the topic is a good teaching strategy. It maximises students' talk time and makes them confident. It also helps them use what they already know to help them learn more. This means they remember the lessons better. Do you get the students to tell you about the lesson or do you explain everything yourself? How can you make students more active in your classes? Think of 2 ways. Try them out in your next classes.
2. How do you encourage students to share their ideas with the class? Giving them positive comments such as 'great idea' and 'thank you' is one. Also giving students time to think and not criticising wrong answers helps . Any more ideas?
3. Your own questions: _____?

1 Look at the photos. Who has got a house like this? Talk to your partner.

2 Read quickly. Match the text with the photos.

Hi! My name's Veasna! I'm from Phnom Penh. There are 3 bedrooms in our house, one for me, one for my mum and dad and one for my sister. Our house is big! We have a kitchen and a living room! We watch TV in our living room. My sister and I play games in our living room, because we don't have a backyard. We always have breakfast in the kitchen. We have a big table there. We sometimes have dinner in the living room, while watching TV. I do my homework in my bedroom. I have a bathroom in my bedroom too! I take a shower before I go to bed. Every day at 7 o'clock, I take a shower for 1 hour!

Hi! My name's Vutha. I'm from Kampong Cham. There are 3 rooms in my house – the living room, mum and dad's bedroom and my sisters' bedroom. I don't have a bedroom! I sometimes sleep in the kitchen, and sometimes in the living room too! Our kitchen is not in our house, it is next to our house. It's small, but everybody likes our kitchen, especially our cat and our dog! We eat together in the living room. We don't have a table. We eat on the floor. I like eating on the floor! Isn't that cool! Oh, and we also have a backyard! It's got a lot of flowers and trees. My sisters and I play games there every day! And I sometimes sleep in our yard too! It's really cool!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Skimming is reading quickly to get a general understanding of texts. This skill is very useful for students. Students don't have to understand all the words in a text to understand it. Can your students skim texts well, or do they stop reading when they see new/difficult words?
2. Giving a short time limit when reading helps students with this. How can you help students skim texts better? Think of 2 ways. Then try them out in your next class.
3. Your own questions: _____?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Working in groups has a lot of benefits. It's a good way to get students to talk more. It encourages sharing of ideas and listening to each other. However, grouping students can be difficult. Some students want to work with their friends only. How did you group students in today's lesson? Was it effective?
2. If students refuse to work with others, what do you do? How can you encourage students to work with anyone in the class? One way to do this is to group them in random (e.g. draw lots). Any ideas?
3. Your own question(s). _____?

Think about the answers to these questions. You don't have to tell anyone the answers!

2. If you feel that new words are familiar, international or similar to Khmer, and that students are likely to know them, make them guess! What do you tell your students if they don't guess right? Do they really have to 'guess right'?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Do you ask your students to read aloud in class? How often do you ask students to read aloud in class?
2. Before you ask students to read aloud in class, do you give them enough opportunities to listen first and understand how texts should be read? Remember that students understand faster through listening and silent reading. If they have to read aloud, make sure they get plenty of practice and that they have had good examples of reading aloud.
3. How do you correct their mistakes when students read aloud? Reading aloud can be a difficult task. Students might feel embarrassed if you keep correcting them. They might also lose confidence. Can you think of ways to avoid embarrassing students? How can you boost their confidence?
4. Your own question(s). _____?

3. Ask students how they feel about the can do statements. Tell students not to worry about the ones they don't tick.

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Most students are visual learners. They learn better when they see pictures/drawings. How often do you draw on the board? Do you feel happy doing this, or do you feel embarrassed?
2. Your drawings don't have to be perfect. Draw fast, big and badly! Don't spend too much time drawing. Using stick people and symbols is a good way to draw fast. Any other ideas?
3. If your drawings are funny and students have to work out what it is, students remember the words they illustrate better. So, the next time you draw, remember to draw fast, big and badly!

Hey! I'm Tom. I'm new in town. I'm from England! I'm 13 years old and I'm in grade 7. I live in Cambodia with my weird family. I love it here and it's cool hanging out with Linda, but sometimes I miss England. My family are weird. My Dad plays guitar. He thinks he's good but he isn't! When he plays the guitar, my baby sister cries. The louder dad plays, the louder she cries! Dad thinks she likes his playing, but I don't think she does! Everyone thinks my little sister is really cute. I have to change her nappy! Oh yuck! I think she is cute but she's boring. She just drinks milk all day. She's drinking milk now. That's my big brother Cam. Cam thinks he's cool, but he's not. He sings to K-pop songs all day and he wants to be cool like them, but he's not really cool. That's my Mum. I love my Mum, but I don't love her cooking! My Mum thinks she can cook Cambodian food. I like Cambodian food when Sophal's mum cooks it, but my Mum's Cambodian food is really bad. We eat it because we don't want her to think we're naughty. I sometimes feed mine to the dog, but he thinks it's bad too! My dog's smart.

3 What does Tom think about his family? Match the sentence halves. Write the sentences in your notebook.

4. Come together as a class and have some students share their work with the class.

(2 mins): Learner assessment and lesson wrap up

Assessing the success of the lesson. Not testing students!

1. Come together as a class and have some students. Read their pieces to the class. The piece requires students to use a range of vocab and grammatical structures. It's a good piece to judge students overall ability.
2. How do you feel students have progressed this year? Are students more confident? Are they interested? How is their grammar? Are they using a lot of Khmerlish (using Khmer grammar to form English sentences)?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. There is a saying in English: There is a difference between a teacher with 20 years of experience and a teacher with 1 year's experience 20 times. It means that good teachers should always try and improve their skills. One way of doing this is to set teaching goals each lesson. What were your personal teacher development goals this lesson?
2. How are you trying to improve your teaching at the moment?
3. What are your professional goals at the moment? Classroom management? Staging? Timing? Something else?
4. Your own question(s). _____?

TAPESCRIPT 9.27.2

Bopha: What do I have for lunch today? I've got some rice. My Dad cooks the best rice. I have some fish, too. My brother goes fishing, and we always have fish for lunch the next day. I have some vegetables and I have an apple, too.
Linda: What do I have for lunch today? Well, usually in England I have a sandwich and an apple, but here in Cambodia, I have Cambodian food for lunch. Today I have some noodles – lots of yellow noodles, and some vegetables. We grow vegetables in our garden. I help! Yum!
Sophal: What do I have for lunch today? I don't eat meat, because I love animals. Animals are our friends and we shouldn't eat them. My family don't understand. Today I'm having rice and vegetables and lots of fruit. I love fruit. It's my favourite!
Dara: What do I have for lunch today? Well, one of my jobs around the house is to make my own lunch. I have to make my own lunch every day. So today for lunch I have… nothing! I don't have any lunch because I didn'tmake any. Linda, can I have some of your noodles?
Linda: Oh, Dara! Not again!

4 T.9.27.2 Match the people with the lunches. Listen and check.

Sophal, Dara, Linda and Bopha.

2. Bopha's brother can fish. ✓
3. Bopha has got some fruit for lunch. ✓
4. Linda eats Cambodian food in England. ✗

6. Linda's family grows vegetables. ✓
7. Meat is Sophal's favourite food. ✗
8. Sophal has some fruit for lunch today. ✗
9. Dara always makes his lunch. ✗

Remember.
In English, we can count some food but not all food.

 = 4 apples ✓ some apples ✓ some apple ✗

 = 1 apple ✓ an apple ✓ some apple ✗

 = some rice ✓ 1 rice ✗ a rice ✗ some rices ✗

6 Look at the list of food again. Write it in the correct column in your notebook.

Can count (a, an, s)	Can't count (**no** a, an, s)
an egg	some fish
a green tomato	some vegetables
an onion	some fruit
an orange	some water
a coconut	some meat
an apple	some milk
some noodles	some rice

Teachers Tip! Countable and uncountable nouns are very hard for students and there are lost of confusing rules. For instance, an apple BUT some fruit. Or some fish (dead ready to eat) or 3 fish (alive swimming in the water). Don't tell them about all rules! The idea of the lesson is to get students to understand the concept that there are such things as countable and uncountable nouns.

1. Ask students if they got everything on their shopping list. Listen to their answers. Are they pronouncing the plural s? Are they adding plural S to things they shouldn't?
2. How can you help students be more aware of plural S sounds?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Do you remember grammar at school? Was it exciting, or boring?
2. Do you think children learn when they are bored?
3. Did you talk about grammar a lot and make the class boring, or did you let students practice the grammar?

Look at our amazing picnic! We have all got something to share. There are some eggs, but don't say anything to Avorng! He doesn't eat eggs. There's some meat, but Sophal doesn't eat meat. He says eating meat is bad. There's some fried rice there. Tom's mum made it. There are some eggs, some vegetables and some meat in the fried rice. Tom doesn't like his Mum's Cambodian food, so he doesn't eat it – unless she's watching! Bopha has got some fruit. She's got 5 apples and 6 oranges. She says she doesn't eat orange things or yellow things and she hates eggs. I don't know why she's got oranges! She really hates them. She's weird. Sophal has got yellow noodles with vegetables. I have some sweets there, but they are Cambodian sweets and English people don't like them. Well, Tom and I don't, anyway! Avorng has got some corn and Dara has got some water. He eats everything. He's got a lot of water. Everyone has to drink lots of water because it's hot today!

I remember Phnom Penh in the 1960s. I was born in Phnom Penh in 1947. In the 60s, I was a teenager. It was fun! It was a good time to be a teenager! There was good music and there were lots of parties! There were cool clothes as well. My clothes were very cool and very beautiful. I was a good dancer, too! I was healthy, young and happy! In the 60s, Phnom Penh was very different! Phnom Penh was smaller. There weren't any tall buildings. There were lots of fruit trees everywhere. There were fruit trees outside my house. There were oranges bigger than your head! There were a lot of cyclos. There were songs about cyclos! And best of all, there weren't lots of cars. There were monkeys everywhere! They were naughty! There were always friends to go shopping with or dance with. I was cool! My best friend was Thida, but I had lots of friends! Sophal: Hi Grandma, can we ask you questions about when you were a child?
Grandma: Oh…I don't remember very well now, but I'll try. Who gets the first question?
Bopha: Me! Grandma, did you play games when you were a child?
Grandma: Of course I did! I played games with my friends. I had a lot of friends.
Sophal: Oh and Grandma, did you play games on the computer?
Grandma: No I didn't. Sophal, we played games with our friends, not with computers. How can you play games with a computer? Computers aren't fun!
Sophal: Did you watch T.V. when you were 13 years old?
Grandma: Hmmm…we didn't have T.V at home. I never watched T.V. But I watched the birds singing in the trees. They are more fun to watch than Cartoon Network. Ugh! I don't like Tom and Jerry!
Dara: Did you help your mum and dad at home a lot?
Grandma: Yes, Dara. I helped them a lot. I cooked breakfast every day. My sister cleaned the house. My brother helped my dad. Everyone was busy. In our day, children helped their mum and dad a lot. Do you help your mum and dad, Dara?
Dara: Hmmm….
Bopha: Did you cycle to school?
Grandma: No, I didn't. I walked to school. I walked with my friends. We walked for 2 hours to go to school.
Sophal, Dara, Bopha: Wow!
Sophal: Did you have a phone?
Grandma: No, I didn't. We didn't have phones when I was your age. We talked with our friends face-to-face, not on a phone!
Sophal: Grandma, did you have internet? Were you on Facebook?
Grandma: Sophal! Now, you're being silly! No one was on Facebook when I was 13. No one was on Facebook when I was 50!

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. All classrooms are different and all students are different. Some are good at speaking and some are good at writing. Some students learn faster than others. Others learn better through pictures and still others learn better through movements. How well do you know your students? Do you pay attention to how your students are learning? What are some of your students' learning styles?
2. Do you vary your activities such that the learning needs of most (if not all) students are met?
3. How do you keep fast-finishing students from being bored? Having extra activities for them and getting them to help you with small tasks might help (e.g. erasing the board, distributing papers). Any more ideas?
4. How can you help students who work slowly? Encouraging them to read the lessons in advance and giving them extra homework might help. Any more ideas?
5. Your own questions: _____?

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. You can't learn a new language if you don't use it. Students should be encouraged to speak English in class. Students don't get enough practice using English outside the classroom, so it's important they practice in class. Did your students have enough opportunities to 'use' English in today's lesson?
2. Students at this level probably do not have enough English yet. This will make them use Khmer in class, to ask you questions or to discuss some ideas. What do you do when you hear students talking in Khmer? What do you do if they answer in Khmer?
3. When your students respond in Khmer, one good thing to do is to 'recast' their answers in English. This means you say them in English, but also make sure that students understood what you said. Responding to them in English is also a good idea. Any more ideas? Does miming/use of gestures help?
4. Your own questions: _____?

TAPESCRIPT 10.29.5

Hi! My name is Chinedu. I'm from Nigeria in Africa. Two years ago, I had the worst holiday ever! Guess what happened! Well I went camping with my friends. We stayed on the mountain for 3 days. On the first day, it rained! We all got wet. We were really cold. We didn't play any games. There was a very strong wind. We just watched the trees dance. It was so dark we couldn't make a fire! Then on the second day I heard strange noises. I was so scared. I knew I heard monster noises. I called my mum, but she didn't answer. I didn't sleep that day. On the last day, something happened. It made me cry. Can you guess what happened?

Hi! My name is Chisum. I'm from the Philippines. Last week, I had the best holiday ever! Guess what happened! Well, I went swimming with my family. We went to 3 beaches! On the first day, we travelled by boat. We ate and sang songs on the boat. We travelled for 4 hours. We were very excited. Then we went to an island. We stayed there for the night. Mum cooked dinner and we ate at the beach. It was the most delicious meal ever. I also met a nice boy. We played volleyball on the beach. I really like him. Yesterday we travelled back home. Something happened on our way home. It made me really happy. Can you guess what happened?

4 T.10.29.5 Listen again. Answer the questions with *No, he/she didn't* and *Yes, he/she did.*

2. Did he make a fire? *No, he didn't.*
3. Was he scared? *yes, he was.*
4. Did Chisum play sports? *yes, she did.*
5. Did she sleep on the island? *yes, she did.*
6. Was she sad? *No, she wasn't.*

5 Write the ending to the stories. Which story has a happy ending? Which story has a boring ending?

On the last day, Chinedu...

Turn to page 236. Is your story ending the same or different?

6 Swap papers. Read your classmates' story endings. Do you like it? Draw ☺

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Teachers learn from each other. It's good to talk to your fellow teachers about things happening in your classroom – whether good or bad. When you share your experience with other teachers, you help create an environment where people learn from each other. Do you discuss / talk to your fellow teachers about your students / your teaching? How often?
2. How happy are you to talk about things that you feel didn't go right in your classroom? If you aren't happy, why do you think this is? Remember, we all learn from our mistakes.
3. Do you share activities and teaching strategies that worked well in your class to your fellow teachers? Remember, sharing is the key. Learn from your fellow teachers as they too, learn from you.
4. Your own question(s). _____?

5. stones *(g)*
6. holes *(b)*
7. light *(e)*

2 Look at the photos.
What are they of?
Guess. Tell your partner.

3 Read quickly. Did you guess right?

Dinosaurs lived 65 million years ago! They lived on land and they lived for 180 million years. They lived for a very long time. They walked and ran fast. They ran faster than any other animals at the time! Dinosaurs spoke to each other too. They spoke by making sounds. Baby dinosaurs made sounds if they were hungry or hurt. They made sounds if they needed help! They could hear quiet and loud sounds! What colour were the dinosaurs? Well, some were brown and green, and some were purple, orange, blue, red, yellow and pink! People who study dinosaurs think their colours were important. Some dinosaurs ate plants. They ate leaves and seeds, and sometimes stones too. But some dinosaurs were really scary. They ate meat. They ate other animals and other dinosaurs too! Some dinosaurs had 60 teeth. They used their teeth to break the bones of strong and big animals. Some dinosaurs could swim, but they couldn't fly. They swam in big rivers and seas. Dinosaurs had eggs. Some were small, like tennis balls. Others were big, as big as footballs! Oh and guess what! All dinosaurs had holes behind their eyes. The holes made their heads light.

3. Praise students who consistently tried speaking in English today. Encourage the others.

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Allowing students to have pride in their work builds their confidence. This means that they are more willing to try and participate in activities. Do you pay attention to what your students produce in class? Do you only look for mistakes in your students' work? How often do you give positive comments?
2. Trying is more important than succeeding, and failure is an opportunity to learn. Did you praise your students for trying their best today? How can you encourage students to try out activities that might be difficult? Do you allow them to take pride in just trying?
3. If activities are done perfectly by most students, this probably means they are too easy. They may be learning nothing new. Do students' works have to be perfect? Do you let students take pride in their work even if they aren't perfect?
4. Your own questions: _____?

3 Read quickly. Did you guess right?

Amika lived a long time ago. She lived 15, 000 years ago. She wore clothes made from animal skins. Her clothes were brown and black. She didn't have a shower, but she sometimes went swimming in the river. She lived with her family and other people. She didn't have a house. She lived in caves. She slept on the ground. She didn't have a bed. She lived in many different caves because they walked a lot. They never stayed in one place. She liked dancing and she played games with other children. They climbed trees and ran around the caves. She had a lot of friends. She didn't play football – no one played football at the time! She never went shopping! There were no shops! She ate fish and plants and other animals. She ate a lot of fruit. Her dad hunted animals and her mum cooked them. Her dad made boats too. She didn't go to school. She couldn't read and write, but she could draw pictures. She drew pictures of animals in the caves. Lions, tigers and elephants lived near them. She was scared of them. She was scared of monsters too!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Think about your lessons when you first started teaching. All teachers have some horror stories - things didn't go well as planned when they first started teaching. What's your story?
2. Now think about your success stories. Did you notice any change in your teaching style / in your understanding of how students learn a foreign language? Take pride in your progress! You deserve it.
3. Your own question(s). _____?

3 T.11.31.2 Read, listen and check your guess!

When I was 10, I went and lived in a pagoda to help the monks. I remember my first day. I was very happy! I got a new bedroom! Other boys slept in there with me. They were nice! They helped me make my bed. But then they said "There are ghosts here! Don't get out of bed! They are angry ghosts and they can hurt you! Remember! Don't get up!" I was so scared! I went to bed, but I didn't sleep! I listened for the ghosts. After an hour, it was dark. I couldn't see anything! Then, there was a big bang next to my bed! The ghosts! They were angry! They were sad, too. I heard crying. They wanted to hurt someone! I was really scared, but I didn't get up! I stayed in bed.

The next morning, I was very tired. But I was very happy! The night before, I stayed in bed away from the ghosts and I didn't get out of bed once, so the ghosts didn't hurt me. I felt brave! The boys said "We're sorry! There aren't really ghosts! We wanted to scare you, but you were brave!" We were friends after that.

Arunny: OK. Just one more Dad! Why do we sleep?
Avorng: hmmmm…..I don't know Arunny. We sleep that's all. Our friends sleep too. Sophal, Dara and Bopha sleep in their beds too.
Arunny: Dad, where do I go when I fly? Where do you go when you fly?
Avorng: You can go anywhere! You can go up the mountain, to the park or by the river! But don't go swimming in the river again!
Arunny: OK. Dad. Can trees talk? Can they talk to me?
Avorng: No, Arunny. Trees can't talk. They don't talk to people and they don't talk to birds!
Arunny: When does school start, Dad. I want to go to school. When can I go to school!
Avorng: Don't be silly, Arunny. You can't go to school. Schools are for people.
Arunny: What do people eat, Dad!
Avorng: They eat a lot of things! They eat chicken, they eat rice, they eat eggs. Sometimes they eat birds, too!
Arunny: Oh – oh (scared)

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't matter if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Children learn better when they 'see' how things are done. They learn very little if you explain and explain. For children, 'showing' what to do works better than 'explaining'. In today's lesson, did you demonstrate most of the activities, or did you talk through each one?
2. In your next lesson, try to demonstrate more and explain less. Did you notice any difference in students' understanding of each task?
3. Your own questions: _____?

33b More questions - Cool superheroes!

1 What are the pictures of? Guess. Tell your partner.

2 T.11.33.2 Match these words with the pictures. Then listen and check. Listen and repeat.

1. a neighbour 2. a superhero 3. special powers 4. bored

3 Read quickly. Did you guess right?

Animal superhero

Hi! I'm Annie! I'm an animal superhero! I save animals! I saved 10 animals last week! Yesterday, I saved a bird! It was really dark! I forgot what time it was. I had so much fun playing football with my friends! Then on my way home, I saw a bird and our neighbour's dog. The dog wanted to eat the bird! I ran quickly and the dog got scared of me!

I don't like school! At school, I study hard but I often get bored! I like saving animals better than going to school. Studying is boring! Saving animals is fun! Sometimes at school, I think about all the animals I saved, and then I feel happy! I have a lot of friends, but they don't like animals. I don't know why. We play football at school. I love playing football at school – it's my favourite! Then after school, we play computer games! I sometimes do my homework – sometimes!
Do I have special powers? Of course! I can listen to animal sounds. I can listen to quiet and loud animal sounds. I know if they are hurt when I listen to their sounds. I am strong! I am stronger than an elephant! I can run really fast! I can run faster than a lion! And I can fly! I can fly higher than Avorng!

TAPESCRIPT 11.33.3

My most memorable day

Congratulation! It's the end of school year! Hmm….What's your most memorable day in grade 7?

Oh, I remember now! My friends took me to a ghost house! I thought I touched a ghost's hair, but it was only noodles! And I thought I touched the ghost's teeth, but it was only corn! Then I touched the ghost's stomach! It really smelled bad! Ugh! But it wasn't a ghost's stomach! It was just clothes – wet clothes! I was so scared, but I didn't let my friends know! I said I wasn't scared! I was brave! This is my most memorable day! My friends were so happy. They laughed like crazy! Can you guess who I am?

Hmm…What's my most memorable day in grade 7? I know. I was in the classroom with my friends! My friends were really naughty on that day! One of my friends was on the table. He stood on the table! Then my other friend was on the floor! She sat on the floor! She didn't want to get up! And I didn't want to talk to my partner. I didn't like my partner on that day. I couldn't forget this day – it's so memorable! Miss Mom had a really bad day. Now we're not naughty! We are good students! Can you guess who I am?

Hmm…What's my most memorable day in grade 7? It was when a new girl came to our class. Her name is Linda! Everyone liked her and nobody wanted to talk to me! All my friends wanted to talk to her! She isn't the smartest in class, but she is the prettiest! I didn't like her at all! But things changed! We're friends now. My friends talk to me and they like me! I go swimming and hiking with them on Saturday and Sunday. Linda sometimes goes swimming and hiking with us, but I don't care! My friends love me and I love them too! Can you guess who I am?

Hmm..My most memorable day? Of course! It was when my new baby was born! She was the prettiest baby ever! She is really good at singing and she can speak English and Khmer! Dara doesn't believe me, but it's true! She sings songs all the time. She wants to go to school. She's really smart! And now she's learning to fly! Oh, I feel really tired sometimes. I have a lot of work to do because of my baby! But she's my favourite thing in the world! Can you guess who I am?

3 **(5 mins): Activity 3. Students listen for the answers (T.11.33.3)**

After the lesson: Thinking about the lesson (Reflection)

Reflection is important and all good teachers do it. It doesn't mater if everything went wrong. What's important is to learn from it! Remember, no lesson is ever "perfect"!

Think about the answers to these questions. You don't have to tell anyone the answers!

1. Look back to when you first started teaching. Do you notice any change in your teaching style / in your understanding of how students learn a foreign language? Make a list! Take pride in your progress! You deserve it!
2. We believe most of your students have significantly improved their English! Congratulations! How many of your students still need extra help in grade 8? Would talking to their grade 8 teacher/s about their progress help? How else can you help them?
3. Apart from English, what do you think your students learned from you that will help them in their everyday lives? What did you learn from them?
4. Your own question(s). _____?
